## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **RESPONSE TO AMENDMENT**

1. This communication is responsive to the amendment filed on May 31, 2005. Claims 1 and 9 have been amended. Claims 1-31 are pending.
2. A telephone call was made to Stuart Langley on August 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

### **Election/Restriction**

3. Restriction to one of the following is required under 35 U.S.C. 121:
  - I. Claims 1-18 are drawn to a system and method for implementing functionality within a network on behalf of a first computer and second computer communicating with each other through the network classified in 709, subclass 247.
  - II. Claims 19-31 are drawn to a system and method for network to computer interfacing classified in class 709, subclass 250.

The inventions are distinct, each from the other because of the following reasons:

### **Subcombination-Usable Together**

4. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as system and method for encoding, more specifically compressing/decompressing data traffic over a communication channel between a front end computer and a back

end computer. Invention II has separate utility such as, a data transport mechanism, more specifically an interface for communicating data with a plurality of data transport links and also employing a blender to multiplex the data from the plurality of data transport links into a shared-bandwidth channel . See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
